

Diversity: Race, Class, and Gender Initiative

The Georgetown University Center on Education and the Workforce's initiative seeks to narrow the information gap on career earnings for minorities and economically disadvantaged students by informing the practice of school counselors and educational advocates and increasing access to information about majors, degrees, unemployment, and earnings.

White House Initiative Educational Excellence for Hispanics (WHIEEH)

In honor of the 25th anniversary of the White House Initiative on Educational Excellence for Hispanics, the Georgetown Center has committed to providing resources in English and Spanish to help narrow the information gap for students and families.

Knowledge about degrees and earnings promotes a more secure economic future since it helps students avoid unnecessary debt and underemployment. Language is often an important marker of social, personal, and political identity. [According to CDC](#), Spanish-language TV remains important for Latinos in the US, even those who are fluent English speakers and who regularly watch English-language TV. [PEW research](#) notes that the prevalence of the Spanish language is projected to rise with the population through the year 2020.

RESOURCES

- » Interactive web tool and webpages
- » Reports that discuss inequality and economics of minority groups
- » Infographics on majors, postsecondary education, and 21st century skills
- » Webinar presentations on relevant topics
